Presents

BECAUSE I COULDN'T GO FOR 3 Defending and Winning Claims, When Winning Matters

SEPTEMBER 11, 2019
Columbus, Ohio

If only things were simple. In complex times, there are complex problems. This is especially true with regard to concluding and litigating claims. The times are changing, and so should we. We will examine the complexities that come with the ever-changing claims and litigation environment in connection with construction and employment claims. We will look at the difficulties presented to insurance carriers in connection with construction and employment-related claims including coverage issues and the potential for extra-contractual liability. What can we learn from the handling of construction and employment-related claims, and what tools can we use, in resolving and successfully litigating claims. Join us to explore how to defend and limit exposure and help us find simple solutions to complex problems. Please bring your questions, comments, and opinions as we always welcome a lively group discussion with our guests. When does winning matter? It matters always. Looking forward to seeing you, and going for three, in Columbus.
