RIPPED FROM THE HEADLINES: Successfully Defending Volatile Claims

PROGRAM

*Estrella Salon
(Business Casual)*

Taking our cue from some of the pressing issues of the day, Eagle International invites you to join us for a thought-provoking seminar on some of the most interesting and challenging claims to defend and resolve. The sustained energy of the #MeToo movement has sparked renewed interest in the problems of sexual harassment and gender-based violence. What challenges are presented when the case you are defending is a powder keg in the current political climate and how do you overcome them? Have these cases increased in value? And how and when can you successfully try them?

In light of recent church and school mass shootings, some voices have called for wider use of firearms as a means of preventing further tragedies. But what liability issues are raised by allowing guns in schools and other places of employment? Where is the balance between the right to bear arms and the right of a business or organization to regulate their premises? Can schools and other organizations be liable for creating an unsafe environment for not arming their employees or for allowing them to be armed?

Overarching every claim is the valuation of potential damages should liability be proven. Our panel will highlight some of the most challenging cases to evaluate and best strategies for gathering the information you need to accurately assess the exposure.
