

EAGLE IS BACK IN PHILADELPHIA

THE MADNESS CONTINUES! (And Other Growing Litigation Concerns)

Get ready! It wouldn't be March without "March Madness" again. And this March, Eagle International Associates is coming to Philadelphia (even if the NCAA Tournament won't be here)! Please join us in Philly on March 22nd as we look back and examine how significant events of the last several years have impacted the casualty insurance industry, and as we look for ways to improve the industry's response to those events into the future. We'll discuss some "crazy" events and changes that have occurred in recent years, and how those have impacted jury verdicts in particular.

This conference is designed to explore these changes in greater depth to provide insight and better response for the insurance industry. This conference will feature four specific panels of highly respected attorneys and claims professionals to help us highlight and examine these issues, which will include discussions on:

1. The Rising Threat of Nuclear Verdicts – How Juries Get There?

Nuclear Verdicts are often a by-product of the jury's desire to "make an example" of a defendant, and ostensibly, to "send a message" with the intent of preventing the type of harm seen in the case from recurring. We will present a panel of experts who will focus a discussion on the factors that drive huge verdicts, and consider ways in which defendants and their insurers may be able to control those factors to minimize, if not eliminate, their impact on verdicts.

2. Litigation Funding – Are We Allowed to Know About That?

With the growing prevalence of third-party litigation funding, questions arise as to handle this issue from the defense perspective. We will have a panel discussion to examine the impact of litigation funding on various forms of civil litigation, and the discoverability of third-party financing, including strategic considerations for discovery tactics.

3. The Plaintiff's Perspective on Litigating in a Post-Covid World

This panel discussion will offer a fresh perspective, and feature some of the most prominent plaintiffs' attorneys in the country who will share their own candid thoughts on what drives the value of their cases, what factors they consider in preparing for trial, and how they view litigation in a post-Covid world.

4. What You Need to Know About Reptile Theory and How it May Impact Your Cases

A panel of our experts will explain what the Reptile Theory is, break down some of the key components of the approach, assess its true value, and consider ways to combat its application.

Following the seminar, please join us for a cocktail reception and dinner.
